## EDUCATION

**Arizona State University, Tempe, Arizona, USA**

**Jan 2026 - Dec 2027**

Master of Science (MS), Computer Science - AI Specialization

**GPA: 4.0/4.0**

**Coursework:** Statistical Machine Learning, Data Mining, Data Processing at Scale, Mobile Computing

**K. J. Somaiya Institute of Technology, Mumbai, India**

**Jul 2020 - May 2024**

Bachelor of Technology (B.Tech), Artificial Intelligence & Data Science Engineering

**GPA: 3.6/4.0**

**Relevant Coursework:** Data Structures, Analysis of Algorithms, Software Engineering, Database Management Systems, Operating Systems, Machine Learning, Artificial Intelligence, Natural Language Processing, Big Data Analytics

---

## PROJECTS

**LeftoverLab, iOS Kitchen Assistant | Swift, SwiftUI, SwiftData**

**Jun 2026**

- Engineered a **privacy-first iOS kitchen assistant** using **SwiftUI** and **SwiftData** that runs entirely on-device, with no accounts, or network calls, generating **leftover-based meal suggestions** from an **82-recipe catalog**.
- Designed a deterministic recommendation engine using **weighted scoring across 4 signals**, including ingredient coverage, **expiration urgency**, English/Hindi synonym normalization, and **Indian dish-pairing rules**, to rank recipes beyond simple keyword matching.
- Validated ranking, classification, and edge-case behavior with **15 Swift Testing unit tests** after decoupling recommendation logic from the **SwiftUI** and **SwiftData** layers. [GitHub](#)

**TrustBin, AI Waste Classification | Next.js, TypeScript, Tailwind CSS, Claude Vision API**

**May 2026**

- Integrated **Claude Vision API** into a **Next.js** and **TypeScript** frontend to classify waste images across **2 input flows**, live camera capture and file upload.
- Rendered each scan as a structured prediction card with **waste category**, **material label**, and **confidence score**, improving result clarity for **100% of scan outputs**.
- Implemented **client-side state handling** and **API response parsing** across camera capture, file upload, loading states, and prediction results to support a smoother **scan-to-result UX flow**. [GitHub](#)

**AI-Jurist, Legal Guidance Chatbot | Python, Llama 2, Hugging Face, Google Colab**

**May 2024**

- Led a **3-person team** to fine-tune **Llama 2** for Indian legal QA, producing plain-language answers for non-expert users.
- Developed a supervised fine-tuning pipeline using **Hugging Face Transformers** and **SFT Trainer**, covering dataset preparation, training setup, fine-tuning, and qualitative evaluation.
- Published the system as a **peer-reviewed IJRAR 2024 paper**, documenting model architecture, fine-tuning workflow, and legal-domain response behavior. [Research Paper](#) [GitHub](#)

---

## EXPERIENCE

**Arizona PBS, Phoenix, AZ | Digital Content Assistant, Part-time**

**Apr 2026 to Present**

- Edited **3-5 video segments per week** for Arizona PBS broadcast and social channels, video editing, captions, and formatting checks to deliver **publish-ready content** on **deadline**.
- Organized **10+ media assets per segment**, including footage, scripts, captions, and graphics, streamlining **post-production** and reducing editing delays for **timely uploads**.

---

## TECHNICAL SKILLS

- Programming Languages:** Python, C/C++, Swift, SQL (MySQL), JavaScript, HTML/CSS, Bash
- Frameworks:** React.js, Node.js, MongoDB, Firebase, SwiftUI, SwiftData, FastAPI, PyTorch, Keras, TensorFlow
- Libraries:** Pandas, Numpy, JWT, Matplotlib, Scikit-Learn
- Developer Tools:** Git, Xcode, Linux, CI/CD tools, Google Colab, Jupyter Notebook
- Computer Science Fundamentals:** Data Structures, Algorithms, DBMS, OS, OOP, ML, DL, RL, NLP
- Soft Skills:** Leadership, Teamwork, Communication, Problem Solving, Cross-functional Collaboration
